Subject: Proposed Amendments to CrR 4.11

Ms. Faulk:

I have been an attorney since 1975, and a full time public defender since 1992. During the course of my legal career, I have encountered numerous instances where the tape recording of defense interviews of prosecution witnesses has been conducted. In my experience the process was quite efficient, and accuracy of the contents of the interview was insured. Law enforcement officers frequently tape record statements when they are investigating criminal matters for those reasons as well. I do not see that either police or prosecution interests are negatively impacted by the proposed amendment to this rule.

Thank you for the opportunity to comment.

Sincerely,

Randall R. Hall, WSBA #: 6161
